

ICT80004 Internship Project

School of Science, Computing and Engineering Technologies

Guide to Internship Project Presentation

Introduction

You will plan and deliver a PowerPoint presentation outlining your project details/outcomes as part of your hand over of what you had accomplished to the host organisation. This presentation will be conducted via video chat in the final week of your internship.

Presentation Objectives

- identify the impact of the internship project experience
- identify growth in skills and knowledge during internship project
- provide a communication experience in a formal setting
- provide a forum for discussion of the internship project with all stakeholders' present

Presentation Guidelines

Please use the following guidelines to develop your presentation (these guidelines will be used by the Swinburne supervisor as a gauge for your assessment):

- organise the presentation schedule in a professional manner
- invite the appropriate audience for the presentation
- prepare slides that reflect your thinking and analysis, and should act as prompts to your verbal presentation revelations
- avoid using "fancy" techniques and visuals to mask a limited analysis
- prepare presentations that has no more than 1 slide per minute (maximum)
- prepare slides that are clear - no more than 6 lines of text per slide, a consistent use of fonts, colours & design and able to be easily read by everyone in the room
- arrange presentations to be about 10-15 minutes with an additional 10 minutes allocated for audience questions.
- practice your presentation (including timing), making certain you do not simply read from your notes. Make eye contact with the audience (look at the camera). Speak clearly, not too fast and at an appropriate volume to be certain everyone in the video chat can hear you.
- introduce your industry and Swinburne supervisors to the audience
- engage your audience but be careful not to allow the presentation to become too chatty and casual
- invite questions if they are not forthcoming
- thank your industry supervisor and your host organisation
- dress appropriately (even if this online) - take into account the culture and protocols of your host organisation
