

1. PEER ASSESSMENT FORM

Project Name:	Technology Application Project – Benchmarking and Securing Language Models Against Adversarial Prompt Attacks - XC2		
Your Name:	Arun Ragavendhar Arunachalam Palaniyappan		
Your ID	104837257	Date	14/09/2025

Peer Assessment Form

The main purpose of this form is for all Team members to reflect on their interactions, but it may also be helpful in resolving disputes over the relative contributions of Team members.

Using the spread sheet **Self and Peer Assessment Form**

1. List the members of your Project Team
2. Enter a score between 0 and 5, for categories A to J for all members of the team (see Section 3 for definitions)

No.	Team Member Names	A	B	C	D	E	F	G	H	I	J	Total
1	Arun Ragavendhar Arunachalam Palaniyappan	5	5	5	5	4	5	5	5	5	5	49/50
2	Vaisakh Pariyacheri	5	5	5	5	5	4	5	5	4	5	48/50
3	Aarathi Narayanan Kadambatta	5	4	5	5	5	5	4	4	5	5	47/50
4	Samsun Gulshan Sheik Dawood	4	5	5	5	5	4	5	5	5	4	47/50
5	Vikas Kadruvan	5	5	4	4	5	5	5	5	5	5	48/50
6	Aayudh Himanshubhai Vaghani	5	5	5	5	4	4	5	4	4	5	46/50

Detailed Comments:

No.	Team Member Names	Comments
1	Arun Ragavendhar Arunachalam Palaniyappan	I was the Technical Lead and Developer and took on a central technical role across all six weeks. My primary work in the first two weeks was studying how prompt injection tricks open-source AI models, identifying three bypass methods, and confirming that many models remain vulnerable and need stronger defenses. Then, I Completed the Establishment section and governance setup, drew the end-to-end architecture diagram, and proofread the final draft for Assignment 1. Beyond documentation, led prompt attack testing : built the dataset grid mapping attack types to social-engineering tricks, generated both direct and paraphrased prompts, and systematically tested them on GPT-5, GPT-4, Gemini, Grok, ChatGPT, and Perplexity Pro. Recorded and documented results with screenshots, identifying success/failure patterns and advising next steps. Completed the full vulnerable code test suite (12 classic vulnerabilities including SQLi, buffer overflow, path traversal, double free), analysed outputs across multiple prompting styles, and inferred lessons about model safety. Consolidated all results into structured reports, ensuring ethical compliance (no sensitive leakage). Presented all findings clearly during the week 6 presentation. A consistent technical team player who not only delivers his tasks but also supports and guides the team's direction.
2	Vaisakh Pariyacheri	Strong team leader and coordinator. Defined the core system design architecture and proposed the paraphraser concept, which shaped the entire project strategy. Wrote the Terms of Reference and linked objectives to deliverables. Chaired planning and stand-up meetings, kept communication open with supervisors and client, and ensured alignment of scope. Also contributed to prompt creation and testing , particularly on Gemini, Grok, and ChatGPT, and researched benchmarking frameworks (e.g., OpenAI moderation API, Perspective API) for evaluation. Consistently reliable and approachable, balancing leadership with active technical input.
3	Aarathi Narayanan Kadambatta	Authored Deliverables/Activities/Capital Resources, giving the team a clear map of outputs and required resources. Played an active role in prompt generation and testing , focusing on reasoning-based models and noting cases where these were more vulnerable to jailbreaks. Shared findings with the team and supported architecture discussions. Contributed steadily to reviews and meetings, offering constructive input on evaluation and dataset structuring.

Peer Review

4	Samsun Gulshan Sheik Dawood	Served as Research Lead and Developer. Authored Organisation/Structure and Schedule (RACI matrix, Gantt chart), setting a clear structure for roles and timelines. Also contributed heavily to testing prompts on ChatGPT, Gemini, and Grok, documenting results and helping with ethical sanitisation of sensitive outputs. Active in meetings, provided insights on attack categories and placement strategies, and helped maintain discipline in documentation.
5	Vikas Kadruvan	Documentation Lead. Authored Introduction and Risks, created the report front page, and handled document sign-off. Also participated in manual prompt testing , running malicious prompts across models and documenting observations. Reviewed reports for readability and consistency, and ensured risks (technical, ethical, and operational) were well captured. Dependable presence, strong in keeping documentation clear and polished.
6	Aayudh Vaghani	Budget Lead. Authored the Budget section, carefully mapping resource costs and aligning them with project scope. Assisted in repository organisation and reproducibility checks. Contributed to prompt testing on ChatGPT-5, Gemini Pro, and Perplexity Pro, documenting results and maintaining the prompt dataset grid. Actively supported team discussions, especially in balancing experimentation with cost and feasibility.

2. Project/Client Review

Review the Project/Client experience below. Be critical but fair in your assessment

Questions	Yes/No
Client provided a clear vision for the students	Yes
Client was available to the students in the first week	Yes
Client is available for every meeting	Yes
You felt Client answers all <u>students</u> questions satisfactorily and clearly	Yes
You felt Client provides complete and clear requirements	Mostly Yes – some details clarified through discussion
The Client usually answers all the emails	Yes
The Client usually answers all the emails within a few days	Yes
The Client keeps changing the requirements	No
The Client communicates regularly	Yes
It is easy to communicate with the Client	Yes
The Client gives conflicting statements in different meetings	No
The Client provides constructive feedback	Yes
The Client provides (or helps in acquiring) all the required resources for the project (e.g. hardware, software, reading material etc.)	Yes
Based on the outcome produced are the project expectations realistic for the first 12 weeks involvement?	Yes
I am finding it a good experience with the Client	Yes
Dealing with the Client is relatively easy	Yes
Issues with the Client are dealt with professionally	Yes
Any Additional Remarks!	
The client (CSIRO Data61) has been supportive and professional. Vision and expectations were clear, and any gaps were resolved in meetings. Resources (papers, tools, feedback) were shared promptly. Communication was constructive, requirements stable, and expectations challenging but realistic. Overall, an excellent client engagement experience.
